ITS Technical Notes

Iowa State University
Windows Enterprise Announcement

August 10, 2007 – New Document – Imaging Systems That Use OpenAFS

A new document is available for IT admins imaging systems that contain the OpenAFS client. OpenAFS has some specific steps needed during the SysPrep/imaging process to prevent slow client performance and severe effects on the AFS file servers. These steps deal with making sure each system has a unique AFS "UUID".

The new document is available in the "OU Administrator Support" area under the "Tips for Deploying Systems and Software" section. A direct link to the document is:
