Subject: Old POP-3 Service to be shutoff September 1

The following is a message that has been sent on a daily basis since May 15th to all remaining faculty/staff and student POP users who are still reading email from the old POP-3 servers. On Wednesday, September 1, these users will no longer be able to read email from the old servers – rather they will have to migrate to Exchange if they are faculty/staff or to CyMail if they are students. The migration process will retrieve any unread email from the POP-3 servers.

A complete up-to-date list of remaining faculty and staff POP forwards can be downloaded from the ISU Exchange SharePoint site at https://webspace.eng.iastate.edu/exchange/ > Shared Documents > Faculty-Staff Forwards (POP Only) 2010-07-16.

We especially encourage you to contact any emeritus faculty from you department who have not yet migrated to help them through the process.

Thanks,

Kent Ziebell
