

## Windows Enterprise Announcement

### August 2, 2011 – CyFiles File Service Attributes Set On User Objects

Effective August 1, 2011 all NEW users have the homeDirectory, homeDrive, and profilePath set to point to ITS enterprise storage. There are a few departmental OUs where the OU admin has requested an exemption.

On August 2, 2011 ITS post-processed all EXISTING users and set the homeDirectory, homeDrive, and profilePath set to point to ITS enterprise storage IF the homeDirectory and profilePath were BOTH clear (not set). Again, a few departmental exemptions apply.

More details are available at:

<http://www.tech.its.iastate.edu/windows/admin/Announce.2011.07.27.pdf>

At this point most users will have a home directory mapped to the letter “U:” at login. These users also have roaming profile storage but it will only be used in areas where group policy allows the use of roaming profiles (it is OFF by default domain policy). More details are available at:

<http://www.tech.its.iastate.edu/windows/admin/Announce.2011.01.04.pdf>

Send any questions/concerns to [storage@iastate.edu](mailto:storage@iastate.edu).
