

## Windows Enterprise Announcement

**June 19, 2014 – sus.iastate.edu - Minor DNS Change July 22, 2014**

On July 22, 2014 ITS will be cleaning up an old DNS entry for the main WSUS server. This server provides Windows Updates (from Microsoft) and third-party application updates from Secunia. This DNS change will not affect most users. Specifically, getting to the WSUS server using the following names/addresses **WILL NOT CHANGE**:

sus.iastate.edu -> 129.186.142.52

However, an old DNS name of "sus.ait.iastate.edu" will no longer work. If you have any systems using "sus.ait.iastate.edu" you should change it to "sus.iastate.edu" as soon as possible prior to July 22, 2014.
